Thu, 10 Jan 2019 14:44:00 GMT Journal and conference papers by Murdoch Gabbay (Jamie) - Box and Cox (1964) developed the transformation. Estimation of any Box-Cox parameters is by maximum likelihood. Box and Cox (1964) offered an example in which the data had the form of survival times but the underlying biological structure was of hazard rates, and the transformation identified this. Wed, 09 Jan 2019 07:07:00 GMT Glossary of research economics - econterms - The theory of constraints (TOC) is a management paradigm that views any manageable system as being limited in achieving more of its goals by a very small number of constraints. Thu, 10 Jan 2019 00:32:00 GMT Theory of constraints - Wikipedia - In computer science, functional programming is a programming paradigmâ€”a

style of building the structure and elements of computer programsâ€”that treats computation as the evaluation of mathematical functions and avoids changing-state and mutable data. These students have been given the impression that the world of mathematics is both finite and linear (the classic algebra-through-calculus sequence).
